EXTRAHOP®

ExtraHop RevealX™ Federal

Be mission-ready and stay ahead of emerging threats with complete visibility and unparalleled context.

U.S. federal government agencies are on a mission. Whether safeguarding critical infrastructure, fostering prosperity, or strengthening national security, federal agencies are at the forefront of addressing the nation's most pressing challenges.

As a result, federal IT teams face an ever-present mandate to protect the mission from threats and risks.

Prevalence of legacy systems poses security challenges and mission risk until replaced, retired, or modernized.

Shortages of skilled cybersecurity professionals leave agencies without enough resources to effectively prevent, detect, and respond to sophisticated threats.

Limited visibility into complex supply chains increases risk as reliance grows on third-party IT vendors to fast-track modernization.

Fast-approaching mandate deadlines require significant changes to infrastructure and processes to meet requirements.

The threat landscape is evolving faster than traditional defenses. If left unchecked, agencies risk disruption of essential services that threaten mission outcomes and national security.

THREATS TO CRITICAL INFRASTRUCTURE

Targeted efforts to disrupt national security and the economy by nation-state and domestic threat actors risk public safety and confidence.

RANSOMWARE ATTACKS

Increasing attack rates threaten essential agency services and data integrity, jeopardizing mission objectives.

DATA INTEGRITY ATTACKS

Sensitive data exposure or manipulation erodes public trust, risks successful mission outcomes, and endangers lives.

SUPPLY CHAIN EXPLOITATION

Growing dependency on third-party service providers creates new vectors for wide-scale attacks by sophisticated adversaries.

PROTECT WHAT MATTERS MOST

To protect the mission and national interests, federal government IT teams must identify and eliminate cyber risks in real time, before they lead to breaches or service outages. This starts with gaining complete visibility into the network, the most powerful source of truth and transparency.

Comprehensive, real-time visibility is the cornerstone of any effective cyber program, including Zero Trust, ransomware prevention, and data integrity protection. The network sees and shows everything, leaving attackers and service-level-impacting issues with no place to hide.

Resolve Threats 87% Faster

See Their Every Move
Gain complete, real-time coverage

Catch Hidden Threats
Detect threats 83% faster

Act Quickly to Defend the Mission
Decrease the time to remediation by 86%

BE MISSION-READY WITH EXTRAHOP REVEALX FEDERAL

ExtraHop is the cybersecurity partner U.S. federal government agencies have trusted for over a decade to reveal cyber risks and build mission resilience.

RevealX Federal—ExtraHop's FedRAMP®-authorized modern NDR platform for federal agencies—delivers unparalleled visibility to expose hidden cyber threats and emerging performance issues that other tools miss. By turning raw network data into real-time insights, RevealX Federal transforms security operations and empowers you to reclaim the advantage.

With this insight, federal agency IT teams can understand, monitor, and analyze all traffic across complex agency networks when every second counts.

FR™
FedRAMP

BENEFITS

KEEP PACE WITH FAST-MOVING RISKS

Improve real-time situational awareness through passive ingestion of network data up to 100 Gbps—including encrypted traffic—and deep analysis of more than 90 protocols.

GAIN COMPLETE NETWORK VISIBILITY

Know everything on your network, from core to cloud, to lay the foundation for advanced security initiatives like Zero Trust and cybersecurity mandates.

PROACTIVELY DETECT AND INTELLIGENTLY RESPOND

Parse immense amounts of network information with cloud-scale AI to detect threats and issues before they can cause real damage.

EXPEDITE TRIAGE AND TROUBLESHOOTING TIME

Accelerate mean time to resolution when every second matters by going from issue to root cause in a few clicks and robust packet forensics to meet incident response and statutory requirements.

SIMPLIFY IT COMPLEXITY AND REDUCE COSTS

Streamline workflows and boost staff impact with a unified platform serving cyber and IT operations.

CUSTOMER SPOTLIGHT

> " With ExtraHop, we can easily search and identify unsecured connections, which lets us mitigate that threat before it ever becomes a problem.

USE CASES

MITIGATE SUPPLY CHAIN RISKS
Uncover threats and suspicious behaviors hidden in critical processes before they lead to costly breaches.

STOP RANSOMWARE ATTACKS
Keep pace with fast-moving risks and prevent costly interruptions of public services before ransomware attacks can hold you hostage.

BUILD MISSION RESILIENCE
Reduce the impact of unexpected downtime on vital services, critical infrastructure, and mission readiness.

ENSURE CYBERSECURITY HYGIENE AND COMPLIANCE
Stay ahead, maintain the health of IT environments, and demonstrate readiness and mandate compliance.

SAFEGUARD REMOTE AND MOBILE WORKERS
Gain full visibility into VPN traffic, remote access protocols, and encrypted traffic to detect threats and prevent outages.

UPSKILL CYBERSECURITY WORKFORCES
Multiply the impact of security and IT operations to respond to what matters so your tier-1 analysts can perform like tier-3 experts.

TAKE THE NEXT STEP

Visit our website to learn how you can achieve full network visibility for your agency to protect and modernize the mission.

ABOUT EXTRAHOP

ExtraHop is the cybersecurity partner enterprises trust to reveal cyber risk and build business resilience. The ExtraHop RevealX platform for network detection and response and network performance management uniquely delivers the unparalleled visibility and decryption capabilities that organizations need to investigate smarter, stop threats faster, and move at the speed of risk.
